

129 mm - Launcher (Multi Barrels) BRY10

Description:

129mm multi-Barrels launcher has been designed and produced by MIC-Sudan (new caliber).

This caliber used to destroy enemy's offensive force, unarmored construction, manpower of the enemy in open or in field type shelters and hidden troops. It can also be used to target artillery batteries fires and destroy platoons of tank, armored vehicles and technical equipments.

Applications:

It is possible to mount it on the vehicle, aircraft, tanks and armored vehicle and marine. As example 15 barrels, 30 barrels are carried on the vehicle, 20 barrels for marine and aircraft forces.

The design of the launcher meets all ergonomic requirements providing easy and safe handling. Manual mechanism drive can be changed into semi-automatic on user's request.
